

T/D M.S. SLIPON FLANGES refers to **Table D Mild Steel Slip-On Flanges**, which are low-pressure commercial piping components manufactured under standards like [BS 10 Table D](#) and [IS 6392](#). These flanges slide over the end of a pipe and are welded from both the inside and outside to provide structural strength and prevent system leaks. They are the most popular economical solution in India for light-duty setups operating up to 10 Bar (PN10) or 50 PSI steam service. [

Key Applications

- **Water distribution pipelines** and utility lines
- **Fire-fighting** network piping
- **HVAC systems** and cooling lines
- **Low-pressure plumbing** and domestic fluid transfers [
