

BOILER BRUSH 1.1/2

A **1.1/2 inch (1.5") boiler brush** is a specialized cleaning tool designed to remove soot, scale, rust, and ash from the inside of boiler tubes, heat exchangers, flues, and pipes. Regular tube cleaning prevents blockages, improves heat transfer efficiency, and reduces energy costs.

Common Styles & Fill Materials

- **Mild Steel (MS) / Carbon Steel Wire:** Best for heavy scale buildup and aggressive rust removal inside durable metal tubes.
- **Stainless Steel Wire:** Corrosion-resistant option ideal for stainless steel tubes to prevent cross-contamination.
- **Brass / Copper Wire:** Medium stiffness; best for softer metal tubes where scratching must be avoided.
- **Nylon / Fiber Fill:** Soft, flexible options suited for removing light soot or cleaning
