

Anchor by Panasonic offers a comprehensive range of 90-meter electrical wires with varying cross-sectional thicknesses (sq mm) designed for household and industrial wiring. These single-core copper cables feature **Flame Retardant (FR) or Extra Flexible Flame Retardant (EFFR) insulation**,

- Features Class 5 flexible copper conductors providing 15% to 20% more bending radius.
- Rated for a current carrying capacity of 7 Amperes.
- Ideal for light fittings, exhaust fans, and general lighting circuits.
- Availab
- High oxygen index (LOI) to slow down and prevent fire propagation
- Class 5 flexible copper conductors for easy bending and installation
- Certified to meet relevant IS 694 standards
- Anti-termite and anti-rodent properties in select advanced insulation grades
