

BATTERY INDICATOR PRO

Battery Indicator Pro refers to two entirely different products depending on whether you are looking for a mobile software application or an external hardware monitoring device. [1]

1. Mobile Applications

If you are looking for a phone or tablet utility, there are two highly rated applications distributed under this name:

- **Battery Indicator Pro (by Fulmine Software):** A popular utility app on the [Google Play Store](#). It provides real-time tracking of your phone's battery health, temperature, and voltage. It features home-screen widgets, big readable digits, and logs your specific percentage-per-hour charging/discharging velocity. [1, 2, 3]
- **BatteryBot Pro:** Another long-standing Android battery utility. It places a highly visible, custom configuration percentage icon directly onto your status bar and provides automatic time-remaining estimates. [
